EDUCATION

Harvard Medical School | Longwood, MA

Master of Biomedical Informatics

December 2024

Northwestern University | Evanston, IL

Honors Program in Medical Education (HPME): 7-year BA/MD program

June 2023

Bachelor of Arts in **Biological Sciences**, Concentration in **Computational & Systems Biology** | Minors: **Data Science & Linguistics**

GPA: 3.92/4.00 | Dean's List (8/9 Quarters)

Relevant Courses: Bioinformatics, RNA Sequencing, Functional Genomics, Biostatistics, Data Science I-III (R), Data Visualization, Computer Programming (Python), Statistics for Language Sciences, Text Processing, Organic Chemistry, Biochemistry

SKILLS

Languages: R | Python | Unix | MATLAB | HTML | SQL | JavaScript

Techniques: AI | Machine Learning | BLAST | Genomics | RNA-Seq | DGE | ChimeraX | Data Visualization | EPA | Microsoft Office

Spoken Languages: Spanish (Intermediate) | Arabic (Beginner)

RESEARCH EXPERIENCE

Mercurial-AI | Chicago, IL

Strategic Advisor and Consultant, AI Tech Start-Up

March 2023 – Present

- Develop, implement, and present strategic and operational changes to garner seed capital from VC outreach programs
- Lead market research and overlook development of deep ensemble neural networks for underserved breast cancer patients

Feinberg School of Medicine, Department of Medicine (Cardiology) | Chicago, IL

Research Fellow, Vaughan Lab

March 2021 – Present

- Probe the RNA-binding protein SERBP1 to combat PAI-1 induced fibrosis, senescence, aging, and Alzheimer's *in vitro*
- Developed a novel, transgenerational epigenetic method of prion-mediated PAI-1 destabilization
- Manage, model, and visualize genomic, plasma, and genealogic data from Amish community with unique null mutation via R

Polytechnic University of Catalonia, Department of Physics | Barcelona, Spain

Research Assistant, Computational Biology and Complex Systems Lab

June 2022 – September 2022

- Designed mathematical and spatial resolution models of the cAMP-PDE signaling pathway in atrial myocytes via MATLAB
- Created differential formulas to model the autonomic effects and calcium levels of atrial fibrillation risk variant rs13143308T

Yale University, School of Management | Remote

Research Assistant, Behavioral Research Lab

March 2022 – July 2022

- Collaborated with an inter-institutional team of professors investigating negotiation strategies between buyers and sellers
- Cleaned, explored, and analyzed negotiation language data, identifying optimal linguistic behaviors via Python and Unix

Bergen County Academies, Cell Biology Research | Hackensack, NJ

Research Fellow, Cell Biology Lab

September 2016 – June 2020

- Studied the PTEN pseudogene in regulating the PI3K/Akt pathway in glioblastomas via miRNA repression *in vitro*
- Conducted bacterial transformation, transfection, qRT-PCR, ELISA, flow cytometry, autophagy and migration assays, etc.

PUBLICATIONS & PROJECTS

- ONGOING: Probing the potential of first-degree relatives' panomic data with machine learning techniques for more personalized and effective treatment recommendations for mental health disorders like depression (**Precision Psychiatry**)
- Predictive NLP Machine Learning Model identifying Classification of 30,000 Medical Abstracts
- Predictive and Machine Learning Regression Models for US County Cancer Mortality Rates
- Personalized Anxiety-Relief Song Recommendations via Spotify API
- SERBP1: Exploiting RNA-Binding Protein-Mediated PAI-1 Inhibition*
- PTENP1: A Pivotal Pseudogene in Glioblastomas*

HONORS & AWARDS

HPME (2021) and Weinberg (2022) Summer Research Grants

2nd Place – Biochemistry, BCA Research Exposition

Regeneron Science Talent Search Scholar

Thermo Fisher Scientific Antibody Scholarship (\$5,000)

WORK EXPERIENCE

Northwestern University Residential Services | Evanston, IL

Resident Assistant

August 2021 – Present

- Oversee 44 residents, serve overnight duty shifts, work the front desk, and develop community builder events
- Represent the RAs on the RA Advisory Board, advocate for adjustments to the position and services
